Profile

Cybersecurity Master's student at Aalborg University with a solid Bachelor's degree in Computer Science. I have a strong academic foundation in network security, IT principles, and troubleshooting, complemented by hands-on university projects. I am a reliable and analytical problem-solver, seeking an entry level student position to apply my theoretical knowledge in a professional environment and further develop my technical skills.

Technical Foundations

- **Security basic:** Knowledge of networking protocols, IoT and foundational cryptography
- **Systems & Networking:** Familiar with Linux command-line and network configuration
- **Programming:** Experience with Python, Java, C/C++, SQL, PHP during studies
- **Governance & Risk:** Familiar with ISO 27001/27002 frameworks and ISMS principles

Education

Master's Degree in Cyber Security

September 2025 - July 2027

Aalborg University - Copenhagen, Denmark

Bachelor's Degree in Computer Science

October 2021 - July 2025

University of Padua - Italy

Projects and Certifications

Network Traffic Augmentation

September 2025 - December 2025

Aalborg University - Copenhagen, Denmark

Co-developed a Python-based system designed to augment network traffic with realistic attack patterns (ARP Spoofing, Port Scanning, Ping of Death) for IDS/IPS testing and security research.

Techathon Winner

October 2025

Denmark - Kongernes Jelling

Developed a prototype with two nRF54L15 boards that, using Bluetooth technology, can be implemented in a museum to enhance the visitor experience.

Certified in Cybersecurity (CC)

December 2024

(ISC)²

Entry-level certification validating foundational knowledge across five core security domains: Security Principles, Access Controls, Network Security, Incident Response, and Security Operations.

Foundational Network and Linux Skills

September 2024 - November 2024

Cisco Networking Academy

Completed three specialized courses: Networking Basics (OSI Model, TCP/IP, LAN/WAN fundamentals), Introduction to Cybersecurity (threats, vulnerabilities, defense strategies), and Linux Essentials (command-line proficiency and system basics).

Cybersecurity Activities & Personal Projects

SOC Engineering Lab | Wazuh & Sysmon — <https://github.com/dadded01/SOC-Lab-Wazuh>

Built a functional Security Operations Center using Wazuh and Sysmon on Ubuntu Server. Currently simulating attack scenarios using Kali Linux and analyzing telemetry to bridge AAU Master's theory with real-world defensive operations.

AAU Copenhagen CTF Sessions

Active participant in bi-weekly university Capture The Flag challenges, focusing on applying theoretical networking and security concepts to practical challenges

Wireless Security Exploration

Conducted personal lab experiments using specialized USB adapters to study WPA2 protocols, including handshake capture and offline password cracking to understand wireless vulnerabilities

Employment History

Waiter

March 2026

Cyprus - Arne Jacobsens Allé 12, 2300 København

Managed customer orders and table service in a fast-paced environment. Prepared and served beverages while ensuring prompt delivery to all guests. Maintained high hygiene standards by clearing, cleaning, and resetting tables
